Subject Index

Volume 82, January 9–June 29, 1998

A

Acetylcholine

Superoxide Production in Vascular Smooth Muscle Contributes to Oxidative Stress and Impaired Relaxation in Atherosclerosis, 1298

Acetylcholine-induced K⁺ channel

ATP-Dependent Activation of the Atrial Acetylcholine-Induced K⁺ Channel Does Not Require Nucleoside Diphosphate Kinase Activity, 971

Acidosis

Response of Intra-acinar Pulmonary Microvessels to Hypoxia, Hypercapnic Acidosis, and Isocapnic Acidosis, 722

Acinus

Response of Intra-acinar Pulmonary Microvessels to Hypoxia, Hypercapnic Acidosis, and Isocapnic Acidosis, 722

Actin

Altered Expression of Tropomodulin in Cardiomyocytes Disrupts the Sarcomeric Structure of Myofibrils, 94

Actin fiber

Angiotensin II Activates RhoA in Cardiac Myocytes: A Critical Role of RhoA in Angiotensin II-Induced Premyofibril Formation, 666

Actin-myosin interaction

How Actin-Myosin Interactions Differ With Different Isoforms of Myosin, 1109

α -Actinin

Breakdown and Release of Myofilament Proteins During Ischemia and Ischemia/Reperfusion in Rat Hearts: Identification of Degradation Products and Effects on the pCa-Force Relation, 261

Action potential

Dynamic Ca²⁺-Induced Inward Rectification of K⁺ Current During the Ventricular Action Potential, 947

Simulation Study of Cellular Electric Properties in Heart Failure, 1206

Active site–blocked activated factor VII

Antithrombotic Effects of Recombinant Human, Active Site–Blocked Factor VIIa in a Rabbit Model of Recurrent Arterial Thrombosis, 39

Adenosine

Adenosine Inhibits Lipopolysaccharide-Induced Cardiac Expression of Tumor Necrosis Factor- α , 47

Adenovirus

Acute Host-Mediated Endothelial Injury After Adenoviral Gene Transfer in Normal Rabbit Arteries: Impact on Transgene Expression and Endothelial Function, 1253

Adhesion of Monocytes to Vascular Cell Adhesion Molecule-1–Transduced Human Endothelial Cells: Implications for Atherogenesis, 871

Gene Therapy for Restenosis: Are We Ready? 306

Lessons From Human Arteries: How to Design a Gene Therapy Strategy for Treatment of Cardiovascular Disease, 1349

Superoxide Production in Vascular Smooth Muscle Contributes to Oxidative Stress and Impaired Relaxation in Atherosclerosis, 1298

Adenylylimidodiphosphate

ATP-Dependent Activation of the Atrial Acetylcholine-Induced K⁺ Channel Does Not Require Nucleoside Diphosphate Kinase Activity, 971

Adherence

Oscillatory Shear Stress Stimulates Adhesion Molecule Expression in Cultured Human Endothelium, 532

Adhesion

Adhesion of Monocytes to Vascular Cell Adhesion Molecule-1–Transduced Human Endothelial Cells: Implications for Atherogenesis, 871

Adhesion molecule

Inhibition of Nuclear Factor- κ B–Mediated Adhesion Molecule Expression in Human Endothelial Cells, 314

β -Adrenergic receptor

Depressed Heart Rate Variability and Arterial Baroreflex in Conscious Transgenic Mice With Overexpression of Cardiac G₁₀, 416

Myocardial Presynaptic and Postsynaptic Autonomic Dysfunction in Hypertrophic Cardiomyopathy, 57

Nitric Oxide Inhibits α_2 -Adrenoceptor–Mediated Endothelium-Dependent Vasodilation, 1323

α_1 -Adrenoceptor subtype

α_1 -Adrenergic Stimulation of Sarcolemmal Na⁺-H⁺ Exchanger Activity in Rat Ventricular Myocytes: Evidence for Selective Mediation by the α_{1A} -Adrenoceptor Subtype, 1078

AHA News

The Working Group Report on Science-Based Categories for Abstracts: Submitted to the Annual Scientific Sessions, 832

Angiogenesis

Angiogenesis Is Coming of Age, 926

Role of Nitric Oxide in the Angiogenic Response In Vitro to Basic Fibroblast Growth Factor, 1007

Thy-1, a Novel Marker for Angiogenesis Upregulated by Inflammatory Cytokines, 845

Angioplasty

Antibody to Thrombin Receptor Inhibits Neointimal Smooth Muscle Cell Accumulation Without Causing Inhibition of Platelet Aggregation or Altering Hemostatic Parameters After Angioplasty in Rat, 980

Expression of Extracellular Matrix Proteins Accompanies Lesion Growth in a Model of Intimal Reinjury, 988

Angiotensin

Local Angiotensin II Generation in the Rat Heart: Role of Renin Uptake, 13

Angiotensin II

Angiotensin II Activates Na⁺-Independent Cl[−]-HCO₃[−] Exchange in Ventricular Myocardium, 473

Angiotensin II Potentiates Vascular Endothelial Growth Factor–Induced Angiogenic Activity in Retinal Microcapillary Endothelial Cells, 619

Angiotensin II Stimulates p21-Activated Kinase in Vascular Smooth Muscle Cells: Role in Activation of JNK, 1272

Angiotensin II Stimulation In Vitro Induces Hypertrophy of Normal and Postinfarcted Ventricular Myocytes, 1145

Angiotensin II Type 1 Receptor–Induced Extracellular Signal–Regulated Protein Kinase Activation Is Mediated by Ca²⁺/Calmodulin-Dependent Transactivation of Epidermal Growth Factor Receptor, 1338

Biphasic Activation of the JAK/STAT Pathway by Angiotensin II in Rat Cardiomyocytes, 244

Cell Type–Specific Angiotensin II–Evoked Signal Transduction Pathways: Critical Roles of G_{βγ} Subunit, Src Family, and Ras in Cardiac Fibroblasts, 337

Mitogenic Effect of Angiotensin II on Rat Carotid Arteries and Type II or III Mesenteric Microvessels but Not Type I Mesenteric Microvessels Is Mediated by Endogenous Basic Fibroblast Growth Factor, 321

Phosphorylation of p130^{Cas} by Angiotensin II Is Dependent on c-Src, Intracellular Ca²⁺, and Protein Kinase C, 1279

Role of Cytoplasmic Tail of the Type 1A Angiotensin II Receptor in Agonist– and Phorbol Ester–Induced Desensitization, 523

Angiotensin II receptor

Angiotensin II Type 1 Receptor–Induced Extracellular Signal–Regulated Protein Kinase Activation Is Mediated by Ca²⁺/Calmodulin-Dependent Transactivation of Epidermal Growth Factor Receptor, 1338

Angiotensin II type 1 receptor

Versatility of the Angiotensin II Type 1 Receptor, 1352

Anisotropy

Characteristics of the Temporal and Spatial Excitable Gap in Anisotropic Reentrant Circuits Causing Sustained Ventricular Tachycardia, 279

Antiarrhythmic drug

Molecular Determinants of Dofetilide Block of HERG K⁺ Channels, 386

Antiarrhythmic drug binding

Inactivation of Voltage-Gated Cardiac K^+ Channels, 739

Antioxidant defense mechanism

Aspirin Increases Ferritin Synthesis in Endothelial Cells: A Novel Antioxidant Pathway, 1016

Novel Antioxidant Action of Aspirin May Contribute to Its Beneficial Cardiovascular Actions, 1021

Apoptosis

Apoptosis: Basic Mechanisms and Implications for Cardiovascular Disease, 1111

Cooperative Interactions Between RB and p53 Regulate Cell Proliferation, Cell Senescence, and Apoptosis in Human Vascular Smooth Muscle Cells From Atherosclerotic Plaques, 704

Effect of Vacuolar Proton ATPase on pH_i , Ca^{2+} , and Apoptosis in Neonatal Cardiomyocytes During Metabolic Inhibition/Recovery, 1139

Myocyte Cell Death in the Diseased Heart, 1231

Possible Involvement of Stress-Activated Protein Kinase Signaling Pathway and Fas Receptor Expression in Prevention of Ischemia/Reperfusion-Induced Cardiomyocyte Apoptosis by Carvedilol, 166

Transfer of Wild-Type p53 Gene Effectively Inhibits Vascular Smooth Muscle Cell Proliferation In Vitro and In Vivo, 147

Arrhythmia

Simulation Study of Cellular Electric Properties in Heart Failure, 1206

Arterial baroreflex

Depressed Heart Rate Variability and Arterial Baroreflex in Conscious Transgenic Mice With Overexpression of Cardiac $G_{\alpha_{\text{bar}}}$, 416

Arterial pressure

Angiotensin II-Nitric Oxide Interaction on Sympathetic Outflow in Conscious Rabbits, 496

Arteries

Sequential Injury of the Rabbit Abdominal Aorta Induces Intramural Coagulation and Luminal Narrowing Independent of Intimal Mass: Extrinsic Pathway Inhibition Eliminates Luminal Narrowing, 996

Arteriosclerosis

Gene Transfer Into Normal and Atherosclerotic Human Blood Vessels, 1243

Aspirin

Aspirin Increases Ferritin Synthesis in Endothelial Cells: A Novel Antioxidant Pathway, 1016

Novel Antioxidant Action of Aspirin May Contribute to Its Beneficial Cardiovascular Actions, 1021

AT₁ receptor

Angiotensin II Activates Na^+ -Independent Cl^- - HCO_3^- Exchange in Ventricular Myocardium, 473

AT_{1A} receptor

Role of Cytoplasmic Tail of the Type 1A Angiotensin II Receptor in Agonist- and Phorbol Ester-Induced Desensitization, 523

Atherosclerosis

Adhesion of Monocytes to Vascular Cell Adhesion Molecule-1-Transduced Human Endothelial Cells: Implications for Atherogenesis, 871

Cooperative Interactions Between RB and p53 Regulate Cell Proliferation, Cell Senescence, and Apoptosis in Human Vascular Smooth Muscle Cells From Atherosclerotic Plaques, 704

Cyclic GMP-Dependent Protein Kinase Inhibits Osteopontin and Thrombospondin Production in Rat Aortic Smooth Muscle Cells, 139

Lessons From Human Arteries: How to Design a Gene Therapy Strategy for Treatment of Cardiovascular Disease, 1349

Plasminogen Activator Expression in Rat Arterial Smooth Muscle Cells Depends on Their Phenotype and Is Modulated by Cytokines, 1086

Superoxide Production in Vascular Smooth Muscle Contributes to Oxidative Stress and Impaired Relaxation in Atherosclerosis, 1298

ATP

ATP-Dependent Activation of the Atrial Acetylcholine-Induced K^+ Channel Does Not Require Nucleoside Diphosphate Kinase Activity, 971

ATP hydrolysis

Regulation of Mitochondrial [NADH] by Cytosolic $[Ca^{2+}]$ and Work in Trabeculae From Hypertrophic and Normal Rat Hearts, 1189

ATP-sensitive K^+ channel

Operative Condition-Dependent Response of Cardiac ATP-Sensitive K^+ Channels Toward Sulfonylureas, 272

Atrial myocyte

ATP-Dependent Activation of the Atrial Acetylcholine-Induced K^+ Channel Does Not Require Nucleoside Diphosphate Kinase Activity, 971

Atrial natriuretic factor

Hypertrophy, Pathology, and Molecular Markers of Cardiac Pathogenesis, 773

Atrioventricular cushion

Epicardium-Derived Cells Contribute a Novel Population to the Myocardial Wall and the Atrioventricular Cushions, 1043

Atrioventricular septation

Formation of the Atrioventricular Septal Structures in the Normal Mouse, 645

Autoimmunity

Recombinant Murine Interleukin-12 Facilitates Induction of Cardiac Myosin-Specific Type 1 Helper T Cells in Rats, 1035

Autoinduction

Cardiac Graft Intercellular Adhesion Molecule-1 (ICAM-1) and Interleukin-1 Expression Mediate Primary Isograft Failure and Induction of ICAM-1 in Organs Remote From the Site of Transplantation, 762

Autonomic dysfunction

Myocardial Presynaptic and Postsynaptic Autonomic Dysfunction in Hypertrophic Cardiomyopathy, 57

Autonomic nervous system

Autonomic Control of Vasomotion in the Porcine Coronary Circulation During Treadmill Exercise: Evidence for Feed-Forward β -Adrenergic Control, 1312

B**Bafilomycin A₁**

Effect of Vacuolar Proton ATPase on pH_i , Ca^{2+} , and Apoptosis in Neonatal Cardiomyocytes During Metabolic Inhibition/Recovery, 1139

Balloon injury

Cell Replication in the Arterial Wall: Activation of Signaling Pathway Following In Vivo Injury, 713

Basic fibroblast growth factor

Mitogenic Effect of Angiotensin II on Rat Carotid Arteries and Type II or III Mesenteric Microvessels but Not Type I Mesenteric Microvessels Is Mediated by Endogenous Basic Fibroblast Growth Factor, 321

Plasminogen Activator Expression in Rat Arterial Smooth Muscle Cells Depends on Their Phenotype and Is Modulated by Cytokines, 1086

Basic fibroblast growth factor mRNA

Early Coronary Angiogenesis in Response to Thyroxine: Growth Characteristics and Upregulation of Basic Fibroblast Growth Factor, 587

Bcl-2 family

Apoptosis: Basic Mechanisms and Implications for Cardiovascular Disease, 1111

Bidomain model

Source of Electrocardiographic ST Changes in Subendocardial Ischemia, 957

Bioenergetics

Impaired Cardiac Energetics in Mice Lacking Muscle-Specific Isoenzymes of Creatine Kinase, 898

Blood flow

ATP-Sensitive K^+ Channels, Adenosine, and Nitric Oxide-Mediated Mechanisms Account for Coronary Vasodilation During Exercise, 346

Blood pressure

Coronary Hemodynamics in Endothelial NO Synthase Knockout Mice, 186

Bovine ether-a-go-go channel

Molecular Determinants of Dofetilide Block of HERG K^+ Channels, 386

Brain

Complement Gene Expression by Rabbit Heart: Upregulation by Ischemia and Reperfusion, 1224

8-Bromo cAMP

Modulation of Ca^{2+} Channels by Cyclic Nucleotide Cross Activation of Opposing Protein Kinases in Rabbit Portal Vein, 557

8-Bromo cGMP

Modulation of Ca^{2+} Channels by Cyclic Nucleotide Cross Activation of Opposing Protein Kinases in Rabbit Portal Vein, 557

Brown Norway rat

Protection of the Arterial Internal Elastic Lamina by Inhibition of the Renin-Angiotensin System in the Rat, 879

C**C-type inactivation**

Inactivation of Voltage-Gated Cardiac K^+ Channels, 739

 Ca^{2+}

Acute Glucose Overload Abolishes Ca^{2+} Oscillation in Cultured Endothelial Cells From Bovine Aorta: A Possible Role of Superoxide Anion, 677

Angiotensin II Type 1 Receptor-Induced Extracellular Signal-Regulated Protein Kinase Activation Is Mediated by Ca^{2+} /Calmodulin-Dependent Transactivation of Epidermal Growth Factor Receptor, 1338

 Ca^{2+} channel

Increase in Functional Ca^{2+} Channels in Cerebral Smooth Muscle With Renal Hypertension, 1330

Myogenic Activation and Calcium Sensitivity of Cannulated Rat Mesenteric Small Arteries, 210

 Ca^{2+} sensitivity

A Mutant Tropomyosin That Causes Hypertrophic Cardiomyopathy Is Expressed In Vivo and Associated With an Increased Calcium Sensitivity, 106

 Ca^{2+} spark

Ca^{2+} Sparks Triggered by Patch Depolarization in Rat Heart Cells, 424

 $[\text{Ca}^{2+}]_i$

Action of Tropoelastin and Synthetic Elastin Sequences on Vascular Tone and on Free Ca^{2+} Level in Human Vascular Endothelial Cells, 328

 $[\text{Ca}^{2+}]_i$ transient

Effects of Overexpression of the Na^+ - Ca^{2+} Exchanger on $[\text{Ca}^{2+}]_i$ Transients in Murine Ventricular Myocytes, 657

cAMP

Synergistic Inhibition of Vascular Smooth Muscle Cell Migration by Phosphodiesterase 3 and Phosphodiesterase 4 Inhibitors, 852

Capillary

Early Coronary Angiogenesis in Response to Thyroxine: Growth Characteristics and Upregulation of Basic Fibroblast Growth Factor, 587

Carboxy-seminaphthorhodafuor-1

Cytosolic Alkalinization of Vascular Endothelial Cells Produced by an Abrupt Reduction in Fluid Shear Stress, 803

Cardiac action potential

Mathematical Model of an Adult Human Atrial Cell: The Role of K^+ Currents in Repolarization, 63

Cardiac arrhythmia

A 17mer Peptide Interferes With Acidification-Induced Uncoupling of Connexin43, 929

Cardiac connexin

Differential Expression of Gap Junction Proteins in the Canine Sinus Node, 604

Cardiac contractility

Inhibition of Rat Cardiac Muscle Contraction and Mitochondrial Respiration by Endogenous Peroxynitrite Formation During Post-hypoxic Reoxygenation, 891

Cardiac development

Cardiac and Extracardiac Expression of Csx/Nkx2.5 Homeodomain Protein, 936

Development of the Cardiac Conduction System, 629

Epicardium-Derived Cells Contribute a Novel Population to the Myocardial Wall and the Atrioventricular Cushions, 1043

Heart Defects in Connexin43-Deficient Mice, 360

Cardiac fibroblast

Cell Type-Specific Angiotensin II-Evoked Signal Transduction Pathways: Critical Roles of $\text{G}_{\beta\gamma}$ Subunit, Src Family, and Ras in Cardiac Fibroblasts, 337

Cardiac function

Murine Cardiac Function: A Cautionary Tail, 519

Cardiac hypertrophy

Acute Pressure Overload Could Induce Hypertrophic Responses in the Heart of Angiotensin II Type 1a Knockout Mice, 779

Biphasic Activation of the JAK/STAT Pathway by Angiotensin II in Rat Cardiomyocytes, 244

Early Coronary Angiogenesis in Response to Thyroxine: Growth Characteristics and Upregulation of Basic Fibroblast Growth Factor, 587

Cardiac malformation

Heart Defects in Connexin43-Deficient Mice, 360

Cardiac muscle

Cardiac Myosin Binding Protein C Gene Is Specifically Expressed in Heart During Murine and Human Development, 130

Isoform Transitions of the Myosin Binding Protein C Family in Developing Human and Mouse Muscles: Lack of Isoform Transcomplementation in Cardiac Muscle, 124

Cardiac myocyte

Cloning and Functional Expression of a Novel Cardiac Two-Pore Background K^+ Channel (cTBK-1), 513

Cardiac myosin

Comparison of Unitary Displacements and Forces Between 2 Cardiac Myosin Isoforms by the Optical Trap Technique: Molecular Basis for Cardiac Adaptation, 1029

Cardiac renin-angiotensin system

Local Angiotensin II Generation in the Rat Heart: Role of Renin Uptake, 13

Cardiac transplantation

Cardiac Graft Intercellular Adhesion Molecule-1 (ICAM-1) and Interleukin-1 Expression Mediate Primary Isograft Failure and Induction of ICAM-1 in Organs Remote From the Site of Transplantation, 762

Cardiomyocyte

Adenosine Inhibits Lipopolysaccharide-Induced Cardiac Expression of Tumor Necrosis Factor- α , 47

Biphasic Activation of the JAK/STAT Pathway by Angiotensin II in Rat Cardiomyocytes, 244

Effect of Vacuolar Proton ATPase on pH_i , Ca^{2+} , and Apoptosis in Neonatal Cardiomyocytes During Metabolic Inhibition/Recovery, 1139

Possible Involvement of Stress-Activated Protein Kinase Signaling Pathway and Fas Receptor Expression in Prevention of Ischemia/Reperfusion-Induced Cardiomyocyte Apoptosis by Carvedilol, 166

Protection of Rat Cardiomyocytes Against Simulated Ischemia and Reoxygenation by Treatment With Protein Kinase C Activator, 451

Cardiomyopathy

Effects of In Vivo Administration of Anti-B7-1/B7-2 Monoclonal Antibodies on Murine Acute Myocarditis Caused by Coxsackievirus B3, 613

α -Tropomyosin Knockouts: A Blow Against Transcriptional Chauvinism, 134

Cardiomyopathy, hypertrophic

Myocardial Presynaptic and Postsynaptic Autonomic Dysfunction in Hypertrophic Cardiomyopathy, 57

Cardiovascular research

Circulation Research: A New Era, 4

Cardiovascular system

Apoptosis: Basic Mechanisms and Implications for Cardiovascular Disease, 1111

Caspase

Apoptosis: Basic Mechanisms and Implications for Cardiovascular Disease, 1111

Catecholamines

Myocardial Presynaptic and Postsynaptic Autonomic Dysfunction in Hypertrophic Cardiomyopathy, 57

Caveolin

Nonuniformity of Endothelial Constitutive Nitric Oxide Synthase Distribution in Cardiac Endothelium, 195

Cell adhesion molecule

Expression and Regulation of Adhesion Molecules in Cardiac Cells by Cytokines: Response to Acute Hypoxia, 576

Cell cultures

Activation of Cardiac Tissue by Extracellular Electrical Shocks: Formation of 'Secondary Sources' at Interstitial Clefts in Monolayers of Cultured Myocytes, 375

Cell cycle

Expression of Cyclin-Dependent Kinase Inhibitors in Vascular Disease, 396

Cell cycle arrest

Transfer of Wild-Type p53 Gene Effectively Inhibits Vascular Smooth Muscle Cell Proliferation In Vitro and In Vivo, 147

Cell cycle control

Transcriptional Activation of the p34^{cdc2} Gene by cdc2 Promoter Binding Factor/Nuclear Factor-Y in Fetal Rat Ventricular Myocytes, 251

Cell growth

Versatility of the Angiotensin II Type 1 Receptor, 1352

Cell replication

Cell Replication in the Arterial Wall: Activation of Signaling Pathway Following In Vivo Injury, 713

Cell stretch

Regulation of Vascular Connexin43 Gene Expression by Mechanical Loads, 786

Cerebral circulation

Increased Expression of Ca²⁺-Sensitive K⁺ Channels in the Cerebral Microcirculation of Genetically Hypertensive Rats: Evidence for Their Protection Against Cerebral Vasospasm, 729

cGMP-dependent protein kinase

Modulation of Ca²⁺ Channels by Cyclic Nucleotide Cross Activation of Opposing Protein Kinases in Rabbit Portal Vein, 557

Chimeric transcription

Timing Is Everything in Life: Conditional Transgene Expression in the Cardiovascular System, 837

Chymase-like activity

Local Angiotensin II Generation in the Rat Heart: Role of Renin Uptake, 13

Circadian rhythm

Depressed Heart Rate Variability and Arterial Baroreflex in Conscious Transgenic Mice With Overexpression of Cardiac G_{sa}, 416

cis-element decoy

Application of Transcription Factor 'Decoy' Strategy as Means of Gene Therapy and Study of Gene Expression in Cardiovascular Disease, 1023

Complement C3

Complement Gene Expression by Rabbit Heart: Upregulation by Ischemia and Reperfusion, 1224

Complement C9

Complement Gene Expression by Rabbit Heart: Upregulation by Ischemia and Reperfusion, 1224

Computer model

Simulation Study of Cellular Electric Properties in Heart Failure, 1206

Computer modeling

Mathematical Model of an Adult Human Atrial Cell: The Role of K⁺ Currents in Repolarization, 63

Concanavalin A

Experimental Autoimmune Myocarditis Produced by Adoptive Transfer of Splenocytes After Myocardial Infarction, 458

Conditional

Timing Is Everything in Life: Conditional Transgene Expression in the Cardiovascular System, 837

Conduction system

Development of the Cardiac Conduction System, 629

Confocal microscopy

Angiotensin II Stimulation In Vitro Induces Hypertrophy of Normal and Postinfarcted Ventricular Myocytes, 1145

Connexin45 Expression Is Preferentially Associated With the Ventricular Conduction System in Mouse and Rat Heart, 232

Spatial Relationship of the C-Terminal Domains of Dystrophin and β -Dystroglycan in Cardiac Muscle Support a Direct Molecular Interaction at the Plasma Membrane Interface, 82

Confocal microscopy immunofluorescence

Localization of Ryanodine Receptors in Smooth Muscle, 175

Connexin

A 17mer Peptide Interferes With Acidification-Induced Uncoupling of Connexin43, 929

Heart Defects in Connexin43-Deficient Mice, 360

Connexin45

Connexin45 Expression Is Preferentially Associated With the Ventricular Conduction System in Mouse and Rat Heart, 232

Constitutive nitric oxide synthase

Nonuniformity of Endothelial Constitutive Nitric Oxide Synthase Distribution in Cardiac Endothelium, 195

Coronary artery

Pulsatile Stretch in Coronary Arteries Elicits Release of Endothelium-Derived Hyperpolarizing Factor: A Modulator of Arterial Compliance, 696

Coronary artery disease

Ineffective Perfusion-Contraction Matching in Conscious, Chronically Instrumented Pigs With an Extended Period of Coronary Stenosis, 1199

Coronary blood flow

Autonomic Control of Vasomotion in the Porcine Coronary Circulation During Treadmill Exercise: Evidence for Feed-Forward β -Adrenergic Control, 1312

Ineffective Perfusion-Contraction Matching in Conscious, Chronically Instrumented Pigs With an Extended Period of Coronary Stenosis, 1199

Coronary endothelium

Nonuniformity of Endothelial Constitutive Nitric Oxide Synthase Distribution in Cardiac Endothelium, 195

Coronary flow

Coronary Hemodynamics in Endothelial NO Synthase Knockout Mice, 186

Creatine kinase

Impaired Cardiac Energetics in Mice Lacking Muscle-Specific Isoenzymes of Creatine Kinase, 898

Csx

Cardiac and Extracardiac Expression of Csx/Nkx2.5 Homeodomain Protein, 936

Cyclic nucleotide phosphodiesterase

Synergistic Inhibition of Vascular Smooth Muscle Cell Migration by Phosphodiesterase 3 and Phosphodiesterase 4 Inhibitors, 852

Cyclin-dependent kinase

Expression of Cyclin-Dependent Kinase Inhibitors in Vascular Disease, 396

Cyclooxygenase

Response of Intra-acinar Pulmonary Microvessels to Hypoxia, Hypercapnic Acidosis, and Isocapnic Acidosis, 722

Cytochrome P-450

Pulsatile Stretch in Coronary Arteries Elicits Release of Endothelium-Derived Hyperpolarizing Factor: A Modulator of Arterial Compliance, 696

Cytokine

Adenosine Inhibits Lipopolysaccharide-Induced Cardiac Expression of Tumor Necrosis Factor- α , 47

Expression and Regulation of Adhesion Molecules in Cardiac Cells by Cytokines: Response to Acute Hypoxia, 576

Recombinant Murine Interleukin-12 Facilitates Induction of Cardiac Myosin-Specific Type 1 Helper T Cells in Rats, 1035

Cytoskeleton

Ca²⁺-Independent Activation of the Endothelial Nitric Oxide Synthase in Response to Tyrosine Phosphatase Inhibitors and Fluid Shear Stress, 686

Cytoskeletal Role in the Transition From Compensated to Decompensated Hypertrophy During Adult Canine Left Ventricular Pressure Overloading, 751

Microtubules in Cardiac Hypertrophy: A Mechanical Role in Decompensation? 828

Spatial Relationship of the C-Terminal Domains of Dystrophin and β -Dystroglycan in Cardiac Muscle Support a Direct Molecular Interaction at the Plasma Membrane Interface, 82

Cytosolic pH

Cytosolic Alkalinization of Vascular Endothelial Cells Produced by an Abrupt Reduction in Fluid Shear Stress, 803

Cytotoxic T lymphocyte

Fas (CD95/Apo-1)-Mediated Damage to Ventricular Myocytes Induced by Cytotoxic T Lymphocytes From Perforin-Deficient Mice: A Major Role for Inositol 1,4,5-Trisphosphate, 438

- Prostaglandin D₂**
Prostaglandin D₂ Inhibits Inducible Nitric Oxide Synthase Expression in Rat Vascular Smooth Muscle Cells, 204

Prostaglandin J₂

Prostaglandin D₂ Inhibits Inducible Nitric Oxide Synthase Expression in Rat Vascular Smooth Muscle Cells, 204

Protease

Flow Rate-Modulated Dissolution of Fibrin With Clot-Embedded and Circulating Proteases, 1102

Protease-activated receptor

Atypical Protease-Activated Receptor Mediates Endothelium-Dependent Relaxation of Human Coronary Arteries, 1306

Protein content

Angiotensin II Stimulation In Vitro Induces Hypertrophy of Normal and Postinfarcted Ventricular Myocytes, 1145

Protein degradation

Breakdown and Release of Myofilament Proteins During Ischemia and Ischemia/Reperfusion in Rat Hearts: Identification of Degradation Products and Effects on the pCa-Force Relation, 261

C-Protein isoforms

Isoform Transitions of the Myosin Binding Protein C Family in Developing Human and Mouse Muscles: Lack of Isoform Transcomplementation in Cardiac Muscle, 124

Protein kinase C

Angiotensin II Activates Na⁺-Independent Cl⁻-HCO₃⁻ Exchange in Ventricular Myocardium, 473

Integrin-Induced Protein Kinase C α and C ϵ Translocation to Focal Adhesions Mediates Vascular Smooth Muscle Cell Spreading, 157

Protection of Rat Cardiomyocytes Against Simulated Ischemia and Reoxygenation by Treatment With Protein Kinase C Activator, 451

Purkinje fiber

Epicardium-Derived Cells Contribute a Novel Population to the Myocardial Wall and the Atrioventricular Cushions, 1043

Purkinje system

Purkinje-Muscle Reentry as a Mechanism of Polymorphic Ventricular Arrhythmias in a 3-Dimensional Model of the Ventricles, 1063

Q**Quail-chick chimera**

Neural Crest Cell Contribution to the Developing Circulatory System: Implications for Vascular Morphology? 221

R**Raf-1 kinase**

Role of Ion Channels and Exchangers in Mechanical Stretch-Induced Cardiomyocyte Hypertrophy, 430

Rat

Mitogenic Effect of Angiotensin II on Rat Carotid Arteries and Type II or III Mesenteric Microvessels but Not Type I Mesenteric Microvessels Is Mediated by Endogenous Basic Fibroblast Growth Factor, 321

Myogenic Activation and Calcium Sensitivity of Cannulated Rat Mesenteric Small Arteries, 210

Normal Development of the Outflow Tract in the Rat, 464

Reactive hyperemia

ATP-Sensitive K⁺ Channels, Adenosine, and Nitric Oxide-Mediated Mechanisms Account for Coronary Vasodilation During Exercise, 346

Coronary Hemodynamics in Endothelial NO Synthase Knockout Mice, 186

Reactive oxygen species

Superoxide Production in Vascular Smooth Muscle Contributes to Oxidative Stress and Impaired Relaxation in Atherosclerosis, 1298

Receptor selectivity

α_1 -Adrenergic Stimulation of Sarcolemmal Na⁺-H⁺ Exchanger Activity in Rat Ventricular Myocytes: Evidence for Selective Mediation by the α_{1A} -Adrenoceptor Subtype, 1078

Reentry

Characteristics of the Temporal and Spatial Excitable Gap in Anisotropic Reentrant Circuits Causing Sustained Ventricular Tachycardia, 279

Purkinje-Muscle Reentry as a Mechanism of Polymorphic Ventricular Arrhythmias in a 3-Dimensional Model of the Ventricles, 1063

Regional myocardial blood flow

Source of Electrocardiographic ST Changes in Subendocardial Ischemia, 957

Renal nerve activity

Angiotensin II-Nitric Oxide Interaction on Sympathetic Outflow in Conscious Rabbits, 496

Renal slice

Role of Nitric Oxide in the Control of Renal Oxygen Consumption and the Regulation of Chemical Work in the Kidney, 1263

Reoxygenation

Protection of Rat Cardiomyocytes Against Simulated Ischemia and Reoxygenation by Treatment With Protein Kinase C Activator, 451

Reperfusion

Possible Involvement of Stress-Activated Protein Kinase Signaling Pathway and Fas Receptor Expression in Prevention of Ischemia/Reperfusion-Induced Cardiomyocyte Apoptosis by Carvedilol, 166

Repolarization

Mathematical Model of an Adult Human Atrial Cell: The Role of K⁺ Currents in Repolarization, 63

Restenosis

Antibody to Thrombin Receptor Inhibits Neointimal Smooth Muscle Cell Accumulation Without Causing Inhibition of Platelet Aggregation or Altering Hemostatic Parameters After Angioplasty in Rat, 980

Application of Transcription Factor "Decoy" Strategy as Means of Gene Therapy and Study of Gene Expression in Cardiovascular Disease, 1023

Cyclic GMP-Dependent Protein Kinase Inhibits Osteopontin and Thrombospondin Production in Rat Aortic Smooth Muscle Cells, 139

Gene Therapy for Restenosis: Are We Ready? 306

Gene Therapy for Restenosis: Getting Nearer the Heart of the Matter, 295
